

Integration Talent.Net (Jr/Sr)

Job description

Ever seen the Steve Ballmer going crazy on developers, developers, developers? Now that's exactly what we are looking for: true developers, passionate about technology.

The basics of your job:

- As a part of the Codit integration team you will implement integration projects on premise and in the cloud on daily basis. You develop, create code and mappings, inter connect people, systems and organizations.
- You develop using technologies such as XML, XSLT, XSD, .NET Framework, C#, Web Services, WCF, SQL Server 2010, AppFabric, Azure.
- Being the first contact with the customer, you know how important it is to communicate well.
- Your analytical thinking helps you to quickly understand customer info and translate it in technical analyses and documentations.
- As a developer, you know how to implement the software solution.

And we add that little extra to your daily job:

- You are never alone: you will find out how easily you can interact with other technology adepts throughout the world. And of course you are supported by the entire Codit integration competence center.
- As a consultant, you get to work at our customers' sites in Belgium.
- A lot of our customers are international organizations, so you often work within an international context.
- Because integration is directly connected to the core activity of the customer, you get acquainted with a lot of other business industries.
- You can work with the newest Microsoft technologies, including the newest cloud solutions. Did you know Codit is a most valuable contributor in the development of new Microsoft technologies?
- You like coaching other people, within Codit and/or at the customer. In your first Codit year, of course you will be guided by your personal mentor within Codit.

Your profile

Junior or senior candidate

You have at least a bachelor degree in IT

You definitely know all about these technologies: XML, XSLT, XSD, .NET Framework, C#, Web Services, WCF, SQL Server 2010, AppFabric, Azure.

Certainly let us know if you know anything about: Microsoft BizTalk Server, WCF, Microsoft SharePoint, SOA, ESB

If you are interested in product development, you need to know ASP.NET, WPF and Silverlight

You are a good communicator

As a consultant, you are a team player that can work independently

You are not afraid to take initiative

Languages: you speak, write and read Dutch and English fluently. French is a plus!

As a consultant you are willing to travel within Flanders on a daily base.

Our offer

You will be part of a young and dynamic company who offers you all possible means to grow in your function. You will have the opportunity and challenge to remain on the edge of the latest technologies and become a Microsoft Certified Technology Specialist.

We offer you a competitive salary with company car and other benefits. On top of that you have an annual Personal Training Budget that allows you to train yourself and grow within the company.

About Codit

Codit is an innovative IT service company and leading consultancy, technology and managed services provider in business integration. We implement different types of integration projects such as B2B, EAI, ESB, SOA and BPM. Our clients include global companies such as Danone, Sabic, SCA Packaging, DSV, Microsoft, ArcelorMittal, Mohawk and many others.

Founded in 1999, Codit has grown to be a valued expert in a wide range of Microsoft technologies, including BizTalk, Workflow Foundation, Communication Foundation, etc. Today we heavily invest in the development of cloud services and solutions using Windows Azure and AppFabric. Besides offering consultancy services, Codit operates the largest Managed Services Center in Europe solely focused on Microsoft integration solutions. Codit operates out of Belgium and France, providing integration expertise all over the world and currently running a turnover of 4 mio € employing over 40 people.

To support our growth, Codit is looking for juniors and seniors with a passion for Microsoft Technology, consultancy and integration.
