

# Nebulus™ IoT Gateway

## KICK-START YOUR IOT JOURNEY

Becoming a connected company is no small decision. But here is how you make it easy. Nebulus™ IoT Gateway allows users to link any sensors or devices to the Microsoft Azure Cloud in only a few minutes.

### SIMPLE IMPLEMENTATION – BIG IMPACT

Nebulus™ IoT Gateway is a software-based IoT solution that instantly connects your devices to (y)our cloud. The gateway provides all required functionality to cope with connectivity issues, cloud-based configuration management and security challenges.

Nebulus™ IoT Gateway comes with several connectors™ and can also use out-of-the-box connectors to link to a wide range of sensors and systems (Bluetooth, Modbus, SNMP, OPC-UA, HTTP(S), SQL, AMQP, MQTT, ...).

Do your sensors and systems come with propriety interfaces? Don't worry. You can develop custom connectors using .NET or let us create a custom connector for you that will meet your specific criteria.

### DESIGNED FOR

Nebulus™ IoT Gateway is a readily available "off-the-shelf" product which you can embed as a software gateway inside your products, or use as a standalone solution to extend your offering. Leveraging the Gateway capabilities allows you to reduce time to market and deliver scalable, cost effective products and services without the need to care about development.

## FEATURES AND CAPABILITIES

Built on Microsoft Azure IoT Gateway SDK, the Gateway supports many different protocols and industry standards. It bridges the connectivity challenges easily without giving in on security, performance, and flexibility.

- Software gateway
- Out-of-the-box modules and connectors
- Dynamic configuration
- Cloud-based device models
- Remote updates
- Device and sensor management
- Secure gateway activation
- Extensible logging and diagnostics

## BENEFITS

### CONNECT

Connect your systems and new devices instantly to the cloud without giving in on security, performance, and flexibility.

### CAPTURE

Capture, aggregate and secure all information from your devices intelligently.

### CONTROL

Leverage the power of the cloud to configure, update, discover and manage your gateways.

## LICENSING

These two licensing models are designed to grow with you, providing all the flexibility you need at every stage.

NEBULUS		NEBULUS +	
Basic managed services are included in this plan: We ensure operational continuity (24/7/365) by monitoring the back-end and making sure that it's up and running. A 24/7 hotline is available.		This premium plan includes advanced managed services: <ul style="list-style-type: none"> <li>• Device Management</li> <li>• User Management</li> <li>• Incident Management</li> <li>• Alert Management</li> </ul>	
Silver	Gold	Platinum	
Up to 1 connected device	Up to 20 connected devices	Up to 100 connected devices
